Toronto, Ontario / Vancouver

Engineering – Software Engineering / Full-Time / Remote

At Warner Music Group, we're a global collective of music makers and music lovers, tech innovators and inspired entrepreneurs, game-changing creatives and passionate team members. Here, we turn dreams into stardom and audiences into fans. We are guided by three core values that underpin everything we do across all our diverse businesses:

- **Curiosity:** We do our best work when we're immersing ourselves in culture and breaking through barriers. Curiosity is the driving force behind creativity and ingenuity. It fuels innovation, and innovation is the key to our future.
- **Collaboration:** Making music and bringing it to the world is all about the power of originality amplified by teamwork. A great idea, like a great song, travels globally. We ignite passions and build connections across our diverse community of artists, songwriters, partners, and fans.
- **Commitment:** We pursue excellence for our team and our talent. Everything in music starts with a leap into the unknown, and we're committed to keeping the faith, acting with integrity, and delivering on our promises.

Technology is one of the most important parts of our business. Whether it's signing up new artists; ensuring we provide the right data to Spotify, YouTube, and other digital service providers; or helping artists use the latest AI tools and make thoughtful decisions with data-driven insights – technology plays an invaluable role in our success. The engineering team at Warner Music Group makes all of it a reality.

WMG is home to a wide range of artists, musicians, and songwriters that fuel our success. That is why we are committed to creating a work environment that actively values, appreciates, and respects everyone. We encourage applications from people with a wide variety of backgrounds and experiences.

Consider a career at WMG and get the best of both worlds – an innovative global music company that retains the creative spirit of a nimble independent.

Position Overview

As a **Software Application Engineer**, you'll play a key role in maintaining, upgrading, and supporting the technical systems that power Warner Music Group's global operations. This hybrid role combines elements of Software Engineering with Site Reliability Engineering (SRE) and operational support, requiring adaptability, technical breadth, and a strong customer focus. You'll thrive if you enjoy keeping complex systems healthy, scalable, and resilient in production.

We are hiring for multiple levels, from motivated New Grads, to highly experienced Senior Application Engineers. Ideal candidates will feel a strong sense of responsibility for the systems under their care, and value continuous improvement, knowledge sharing, communication and cooperation.

Responsibilities:

Software Engineering & Upgrades

- Write clean, maintainable code in Java or Python (backend) and Angular or React (frontend)
- Upgrade application frameworks (e.g., Java, Angular) to stay current with security patches, support, and performance improvements
- Debug and resolve systems errors identified by automated or manual testing

Reliability & Monitoring

- Monitor production systems and improve observability to detect and resolve issues proactively
- Lead root cause analyses (RCA) for outages and implement corrective actions
- Conduct performance and scalability testing, identify bottlenecks, and implement optimizations

Support & Operations

- Partner with business and operations users to troubleshoot, document, and resolve issues
- Execute manual workflows (e.g., data queries, AWS resource modifications, job restarts) and automate them for efficiency
- Participate in the on-call rotation, responding to high-priority production incidents

Automation & Continuous Improvement

- Enhance CI/CD pipelines (e.g., GitHub Actions, infrastructure-as-code (IaC))
- Contribute to and maintain team knowledge bases, runbooks, and technical documentation
- Drive continuous improvement through process automation and tooling enhancements

About You:

- Experience in software development, ideally with Java or Python (backend) or Angular/React (frontend)
- Experience with relational databases (Oracle, PostgreSQL) and writing SQL queries
- Effective communicator who can bridge technical and non-technical discussions
- Comfortable collaborating in distributed teams across multiple time zones

Preferred Qualifications:

- Experience working with enterprise systems and modernizing them
- Hands-on experience with Infrastructure as Code (IaC) to manage cloud resources, ideally in AWS
- Ability to diagnose and resolve issues across desktop, network, and web layers
- Experience being on-call, managing incidents, and meeting SLA commitments

\$63,000 - \$130,000 a year

Compensation: This position offers a base salary of \$63,000 - \$130,000 CAD. In addition to base salary, this role is eligible for a performance based annual bonus.

Vacancy Status: This posting is for an active, existing vacancy.

As the home to 10K Projects, Asylum, Atlantic Music Group, East West, FFRR, Fueled by Ramen, Nonesuch, Parlophone, Rhino, Roadrunner, Sire, Warner Records, Warner Classics, and several other of the world's premier recording labels, Warner Music Group champions emerging artists and global superstars alike. And our renowned publishing company, Warner Chappell Music, represents genre-spanning songwriters and producers through a catalog of more than one million copyrights worldwide. Warner Music Group is also home to ADA, which supports the independent community, as well as artist services division WMX. In addition, WMG counts film and television storytelling powerhouse Warner Music Entertainment among its many brands.

Together, we are Warner Music Group: Independent Minds. Major Sound.

Love this job and want to apply?

Click the "Apply" link at the top of the page, or apply directly with your LinkedIn. Applying with LinkedIn will import all of the information you put in your profile, but will still allow you to upload a resume and cover letter.

Don't be discouraged if you don't hear from us right away. We're taking our time to review all resumes, and to find the best people for WMG.

Thanks for your interest in working for WMG. We love it here, and think you will, too.

WMG is committed to inclusion and diversity in all aspects of our business. We are proud to be an equal opportunity workplace and will evaluate qualified applicants without regard to race, religious creed, color, age, sex, sexual orientation, gender, gender identity, gender expression, national origin, ancestry, marital status, medical condition as defined by state law (genetic characteristics or cancer), physical or mental

disability, military service or veteran status, pregnancy, childbirth and related medical conditions, genetic information or any other characteristic protected by applicable federal, state or local law.
