About Capital One Canada

For 30 years, we've been on a mission to change banking for good and build relationships by making credit accessible, simple, intuitive and rewarding. We want to help Canadians succeed with credit, because we believe in people — in our customers, in our associates, and in talent like you!

About the Team

Yes, we're a credit card company. But we're more than that too. We're driven by what our customers want, and how to make their lives simpler.

We're always looking for creative ways to offer digital solutions that make sense for our customers. With your help, we'll build the next generation of banking in Canada based on customer-focused values, compelling products and great engineering.

About the Role

Our environment is creative, filled with teams that are passionate about the work they're doing and the people they are doing it for. We're a technology thought leader in the financial industry and we want to keep it that way.

We have a passion for open-source and for working with the latest technologies. Whether you're a big Apple fan or an Android lover, a UI developer or prefer NoSQL databases over anything else, you'll fit in our team. All you need is to be passionate about technology!

Below are some of the skills the team is looking for, but you're not expected to have them all. Curiosity and willingness to learn are what matter most.

- IDE:
Android Studio, XCode, Visual Studio Code, IntelliJ
- Language:
Kotlin, Swift, Javascript, Typescript, GoLang, NodeJS
- AWS:
S3, EC2, Lambda, Route53, Security Groups, IAM roles
- Monitoring Tool:
Splunk, New Relic, Cloudwatch
- Testing Framework:
MockitoJUnitRunner, Espresso, XCTest

Our Associates are involved in business critical projects. Here are some examples.

- Improve user experience for Android / iOS customers
- Develop CI/CD pipelines to AWS cloud environment
- Remediate and enhance cyber security
- Create front end applications with React and Angular.

- Develop backend Microservice applications and APIs

Think it. Code it.

This is our motto! By that, we mean that you, as a member of one of our great Agile teams will be responsible for the design, coding, testing and delivery of solutions that benefit our customers and Canadians in general.

Continuous Learning

We're here to help you develop your knowledge and skills, both on the job and in the classroom. Our engineers have access to incredible continuous learning tools and courses through our very own Tech College, a world-class learning hub that offers both online and in-person classes for across multiple disciplines—Cloud Computing, Cyber Security, Mobile Development, Machine Learning & AI, to name a few.

As a new Software Engineer, you'll join the Tech Development Program (TDP), which takes place over your first year with us and involves hands-on learning, development, and networking. Throughout your time in the program you could tackle front-end, back-end, full-stack, mobile development, or maybe even all of them.

Your Responsibilities:

- Work as part of a dynamic team throughout the software development life cycle
- Collaborate with designers and analysts to implement enhancements or new applications
- Develop code to meet story acceptance criteria
- Conduct design and code reviews to ensure high-level quality output
- Ensure adherence to continuous improvement practices as required to meet quality, and time to market imperatives
- Maintain records to document program development, and revisions
- Provide third-level support of software solution as needed

Basic Qualifications:

- Have obtained a Bachelor's degree or higher between September 2025 to September 2026
- Good communication, presentation, and writing skills
- Good understanding of testing fundamentals
- Experience in unix or linux operating systems
- Able to work within a team setting and actively participate and collaborate in team discussions

Preferred Qualifications:

- Experience in front end development such as JavaScript, HTML, mobile, frameworks such as React, Vue, Angular

- Knowledge of programming languages, including but not limited to Java, Python, JavaScript, NodeJS, Kotlin.
- Experience with Jenkins CI/CD, microservices, API design / integration
- Experience with version control technology i.e. Git
- Experience in a Linux/Unix environment with strong coding background .

Working at Capital One.

Enjoy a hybrid work environment, with 3 days in the office. Build a comfortable workspace with our one-time, Work From Home allowance and enjoy our head office located conveniently across the street from Union Station.

Live well—physically, financially and emotionally. Receive support for you and those who are most important to you, with full coverage for spouses, domestic partners, and dependents.
