Company Overview

Intuit is the global financial technology platform that powers prosperity for the people and communities we serve. With approximately 100 million customers worldwide using products such as TurboTax, Credit Karma, QuickBooks, and Mailchimp, we believe that everyone should have the opportunity to prosper. We never stop working to find new, innovative ways to make that possible.

Job Overview

Join the Center of Money team as a Full Stack Software Developer and accelerate your career while building impactful financial technology. You'll contribute to strategic products and new growth initiatives that help Intuit reach new customers and deliver meaningful innovation.

We're a fast-moving, customer-obsessed team that values learning, experimentation, and collaboration. You'll work alongside experienced engineers, gain exposure across the full stack, and help ship features that create measurable value for the business and the customers we serve.

Responsibilities

- Contribute to the delivery of high-quality web software including requirements clarification, design discussions, coding, testing, and documentation
- Spend the majority of time (90+%) hands-on coding, learning, and improving implementation skills
- Participate in code reviews and incorporate feedback to improve code quality and engineering practices
- Assist in resolving defects/bugs identified during QA testing, pre-production, and production
- Collaborate effectively with team members to deliver against sprint commitments
- Work cross-functionally with product management, QA/QE, and other engineering teams to support shared goals
- Follow established engineering processes, standards, and best practices
- Demonstrate a commitment to team success and positive team dynamics
- Show curiosity and passion for growing technical skills in service of customers
- Participate in Agile ceremonies (standups, sprint planning, retrospectives) and contribute actively

Qualifications

- BS in Computer Science or related technical field (or equivalent practical experience)
- 0-2 years of experience developing web, software, or mobile applications (internships and academic projects welcome)
- Foundational understanding of software engineering principles and object-oriented programming
- Experience (academic or professional) with at least one object-oriented language such as Ruby, Java, C#, Python, or C++
- Basic understanding of the Software Development Life Cycle (SDLC)

Exposure to unit testing and testing fundamentals (TDD is a plus)

- Eagerness to learn, take feedback, and grow within a collaborative engineering environment
- Strong problem-solving skills and attention to detail
- Effective verbal and written communication skills
- Positive, helpful attitude and willingness to take ownership of assigned tasks

Intuit provides a competitive compensation package with a strong pay for performance rewards approach. This position may be eligible for a cash bonus, equity rewards and benefits, in accordance with our applicable plans and programs (see more about our compensation and benefits at [Intuit®: Careers | Benefits](#)). Pay offered is based on factors such as job-related knowledge, skills, experience, and work location. To drive ongoing fair pay for employees, Intuit conducts regular comparisons across categories of ethnicity and gender. The expected base pay range for this position is:

Ontario \$ 99,000- 133,500
