

We simplify business finance, from corporate cards to bill payments and reimbursements.

Plus, we now offer a 4% high-yield interest account, with more financial services and banking options on the way. And we're hiring!

Who we are

A collection of ambitious, collaborative and mission-driven people from all walks of life, Floaters have one thing in common: our goal of helping Canadian businesses not just survive but thrive. Our team and investors bring experience from leading software companies including Uber, Shopify, Top Hat, TouchBistro and Ada.

What we do

We're building Canada's complete business finance solution that helps Canadian companies do more with their money. Ever had to put a business expense on a personal card and wait for reimbursement? Or fill out an expense report that gets sent back twelve times? Or lost a receipt finance needed to file? Maybe you've been a small business owner dealing with slow bank transfers or struggling to access capital in the first place. We're fixing all of that—and more—for employees and finance teams alike.

Why we do it

We believe Canadian businesses deserve better, simpler financial tools. Too often, they're held back by outdated processes, unnecessary barriers and banking inefficiencies that stifle growth. At Float, we're on a mission to change that. By cutting through red tape and simplifying finance, we help businesses save time, seize opportunities, and focus on growth.

About Float

Float is on a mission to simplify finance for Canadian businesses, empowering them to eliminate complexity and unlock new opportunities. Through our innovative platform, Float enables businesses to streamline financial operations and optimize cash flow, so they can focus on what matters most: growth.

As one of [Canada's fastest growing companies](#) and top-rated startups in [2024](#) and [2023](#), Float is customer-obsessed, passionate and entrepreneurial, with a team that includes leaders from Uber, Shopify, Top Hat, TouchBistro, Bill, Stripe, and Ada.

At Float, everyone is an owner, bringing their unique perspective to our team and product. Your voice is important, and we take having a culture based on feedback seriously. We openly share our thoughts and differing opinions so we can continue to improve. We do our best to keep our decision-making decentralized so that all team members feel ownership in our success.

Our Product

Float is Canada's complete business finance platform, combining modern financial services and software to help businesses spend, save, and grow. Trusted by 6000+ Canadian companies, Float provides high-limit corporate cards, automated expense management, next-day bill payments, high-yield accounts and fast, friendly support—all built in Canada, for Canada. Float is backed by world-class venture and fintech investors, including Growth Equity at Goldman Sachs Alternatives and OMERS Ventures, partners behind our [\\$70 million Series B raise](#).

Our team is a collection of ambitious, collaborative and mission-driven people from all walks of life but with one goal: helping Canadian companies not just survive but thrive. And we're looking for bold innovators to help shape the future of business finance in Canada.

AI Use in Our Hiring Process

We use technology, including artificial intelligence (AI), to support parts of our hiring process. This may include AI-assisted scheduling and candidate communications, and AI-generated interview notes, guides or summaries to help our team focus on the conversation. All hiring decisions are made by our hiring team.

We're always excited to meet great talent for this role. Even if there isn't an immediate opening, we keep applications on file and connect with candidates when new opportunities arise.

About The Role

This role sits on one of Float's **product-focused engineering squads**, responsible for building end-to-end experiences used daily by thousands of Canadian businesses. You'll work across the stack to deliver intuitive, reliable, and scalable product features that directly impact customers' financial workflows.

We are hiring **across multiple levels** for this role. Our interview process is designed to evaluate candidates objectively based on scope, judgment, and learning velocity, and we will level accordingly. As Float continues to grow, there are meaningful opportunities to expand ownership, deepen technical impact, and take on broader responsibility regardless of starting level.

This role is well-suited for developers who enjoy product thinking, end-to-end ownership, and balancing speed with quality in a high-autonomy environment.

What You'll Be Doing

- Build and evolve end-to-end product features across backend, frontend, and APIs.
- Partner closely with Product and Design to deliver simple, intuitive user experiences.

over time.

- Contribute to shared standards, tooling, and practices that raise engineering quality.
- Work within a small, empowered squad with clear ownership over a product vertical.

What Success Looks Like (6–12 Months)

- You ship meaningful product features that are used and valued by customers.
- Your work improves the clarity, usability, or reliability of core product flows.
- You take ownership of a meaningful slice of the product and execute with confidence.
- You collaborate effectively across Product, Design, and Engineering.
- Your judgment and execution raise the bar for your squad and peers.

What We're Looking For

- Experience building full stack product features in a modern web environment.
- Comfort working across backend, frontend, and APIs (depth may vary by individual).
- Strong product and customer intuition — you care about what you're building and why.
- Ownership mindset for features in production.
- Curiosity, adaptability, and a desire to keep improving your craft.
- Bonus: experience with Python/Django, TypeScript/React, AWS, or fintech products.

Our Hiring Philosophy

- **Values > Aptitude > Skills**
- **Slope > Intercept**
- **Collective Bar Raising**

We hire for character, curiosity, and learning velocity before credentials. Titles matter less than impact, and growth is expected as scope and ownership increase.

Why You Should Join

- Work at one of Canada's fastest-growing fintech companies
- Make a real impact in a high-autonomy, high-growth role
- Collaborate with an ambitious and supportive team
- Competitive compensation, equity options, and benefits
- Hybrid work model – we are based in Toronto with in-office days for connection and collaboration
- Enjoy catered team lunches every Tuesday, Wednesday and Thursday
- Bring your pup to our dog-friendly office
- Thrive in a high-trust, high-performance culture where your work truly matters

In Short

At Float, you'll thrive if you're bold, curious, and eager to make a real impact. We're building something special—and having a lot of fun along the way. If you're excited to build, grow, and win together, **we'd love to meet you.**

We're committed to building a workplace that's welcoming and accessible for everyone. If you need any accommodations during the hiring process or once you join Float, just let us know! You can reach out to [Vic \(vic@floatfinancial.com\)](mailto:vic@floatfinancial.com), and we'll work with you to make sure you have what you need to succeed.
