Company Overview

Intuit is the global financial technology platform that powers prosperity for the people and communities we serve. With approximately 100 million customers worldwide using products such as TurboTax, Credit Karma, QuickBooks, and Mailchimp, we believe that everyone should have the opportunity to prosper. We never stop working to find new, innovative ways to make that possible.

Job Overview

As a Software Developer 1, you will be an integral part of our engineering team, contributing to the design, development, and maintenance of high-quality software solutions. This role is ideal for an enthusiastic and talented individual looking to grow their career in a dynamic and innovative environment. You will work closely with experienced engineers, product managers, and other stakeholders to deliver impactful features and improvements.

Responsibilities

- * Participate in the full software development lifecycle, including requirements gathering, design, coding, testing, and deployment.
- * Write clean, efficient, and well-documented code in accordance with established coding standards.
- * Collaborate with team members to troubleshoot and resolve software defects and issues.
- * Contribute to code reviews, providing constructive feedback and learning from peers.
- * Learn and apply new technologies and development methodologies as needed.
- * Assist in the creation and maintenance of technical documentation.
- * Actively participate in team meetings and discussions, sharing ideas and insights.

Qualifications

- * Bachelor's degree in Computer Science, Software Engineering, or a related field.
- * Strong foundational understanding of computer science principles, including data structures, algorithms, and object-oriented programming.
- * Proficiency in at least one programming language (e.g., Java, Python, C++, JavaScript).
- * Familiarity with software development tools and version control systems (e.g., Git).
- * Excellent problem-solving and analytical skills.
- * Strong communication and interpersonal skills, with the ability to work effectively in a team environment.
- * Eagerness to learn and adapt to new challenges and technologies.

Preferred Qualifications:

- * Internship experience in software development.
- * Experience with agile development methodologies.
- * Familiarity with cloud platforms (e.g., AWS, Azure, GCP).
- * Understanding of database concepts and SQL.

Intuit provides a competitive compensation package with a strong pay for performance rewards approach. This position may be eligible for a cash bonus, equity rewards and benefits, in accordance with our applicable plans and programs (see more about our compensation and benefits at [Intuit®: Careers | Benefits](#)). Pay offered is based on factors such as job-related knowledge, skills, experience, and work location. To drive ongoing fair pay for employees, Intuit conducts regular comparisons across categories of ethnicity and gender. The expected base pay range for this position is:

Career Path

Mobility plays an important role for our engineering community. In addition to vertical growth, our teams offer lateral growth opportunities. Whether it's working on a different tech stack or product, Intuit will help you get to the next step in your career.

Intuit supports you, not just as you are now, but as the person that you want to grow to be.

Alex Pollock
Senior Software Engineer
